AQUAFUEL PREMIUM may be used with pesticides that either require or suggest the use of surfactants and/or ammonium sulfate as the recommend adjuvant.

PRODUCT BENEFITS

- Convenient premix for use with Enlist technology
- Designed for glyphosate, glufosinate and other herbicides requiring a high load of AMS
- Pre-dissolved liquid ammonium sulfate means reduced nozzle plugging and sedimentation.
- Conditions water in the tank and works on the leaf surface to move the herbicide into the plant.
- Formula designed to minimize foaming
- Can be used in place of ordinary surfactants, dry ammonium sulfate or other ammonium sulfate replacement products to maximize simplicity and performance

DIRECTIONS FOR USE

The addition of adjuvants to some pesticides and or fertilizers and their tank mixes may cause phytotoxicity to the foliage and/or fruit of desirable crops. The applicator or crops advisor must have experience with the pesticide combination.
